EDUCATION

Princess Sumaya University for Technology BSc Software Engineering Sep 2020 - Present
GPA 90.5/100 - Honors, 3rd on Batch during the 2022-2023 Second Semester

Projects

- Developed and executed an **Android application using Kotlin** at Wings Shop, the project showcased proficiency in app development and the utilization of Kotlin programming language.
 - Spearheaded the development of an **ATM Machine Application using C# Windows Forms. NET** framework, resulting in streamlined operations, improved user experience, and predicted 87% customer satisfaction ratings.
 - Championed the development of multiple **projects in Flutter using Firebase**, showcasing proficiency in cross-platform mobile application development. Achieved seamless integration with Firebase services, ensuring robust functionality and data management.
 - Led the creation of a precise **Software Requirements Specification (SRS)** document for Haweytak, optimizing the secure storage of governmental information with keen attention to industry standards.
-

WORK EXPERIENCE AND ACHIEVEMENTS

Google Developers Student Club Oct 2022 - Present

Core Team Member - Event Organizer

Orchestrated and facilitated multiple educational initiatives on Google Technologies:

- Actively partook in the coordination of two comprehensive **Flutter Workshops** over the course of 3 weeks, participating as a Teaching Assistant in one.
- The workshops aimed to empower participants with the skills needed to achieve a 40% proficiency increase in Flutter development within the first month.
- Proposed to the planning and execution of a **Web Development Workshop** as part of a collaborative team effort, fostering a cooperative learning environment and achieving a 55% participant success rate in deploying web applications.
- Played a crucial role in the organization of three enlightening **TechTalks** covering topics such as Machine Learning, Deep Learning, and the fundamentals of **Git** and **Github**.
- These sessions aided in the 30% rise in participant understanding and practical application of these advanced technologies.

SkyTech SAP Jun 2023 - Aug 2023

Internship Trainee

- Utilized **C#** as the **backend** technology to seamlessly interface with SAP systems at SkyTech, employing **DI API** and **B1 sLayer**.
- This strategic implementation facilitated enhanced system integration, contributing to an improvement in data accuracy and an increase in overall operational efficiency.

Zeva International Aug 2022 - Oct 2022

Internship Trainee

- Contributed to **Angular-based** graphical user interface development in a three-person team at Zeva International as an Internship Trainee, significantly enhancing user experience.
 - Played a pivotal role in a team focused on improving **UI** development skills.
-

SKILLS AND COMPETENCIES

Key Competencies: C Programming Language, C++/C#, Java, Python, Mobile Application Development, JavaScript/Query, Web Development, SQL, Data Structures and Algorithms, Source Code Management, Object Oriented Programming, Design Patterns

Languages: Arabic (Native), English (Fluent), German (Beginner)
